ABOUT

- 1.5 years in Frontend Development, Higher technical education (GPA 4.2), advanced English (C1), collaboration in international cross-functional teams
- Technology Stack: HTML, CSS, JavaScript, React, Next, Redux, TypeScript, Tailwind
- Solid in Algorithms and DSA, have skills in Figma
- Eager to create eye-catching interfaces with cutting-edge web technologies
- Focused on blending aesthetics and functionality, driven by a keen eye for detail
- Goal for the nearest future is to continuously evolve in the realm of modern Frontend Development

SKILLS

LANGUAGES

- ENGLISH Advanced C1 IELTS 7.5
- TURKISH Beginner A2
- RUSSIAN Native
- TATAR Native

WORK EXPERIENCE

Frontend Developer

Freelance • April 2023 - Present

Software Engineering • Web Development

- Crafted 10 compelling landing pages from scratch, harnessing HTML, CSS (SASS), and JavaScript (ES6+) to captivate audiences. Leveraged cutting-edge Flexbox, Grid, Transitions, and Animations to deliver seamless experiences, resulting in a 20% increase in customer engagement
- Engineered 3 top-of-the-line single-page applications (SPAs) using React & Tailwind, transforming audience interactions with intuitive interfaces and faster load times, leading to a 30% boost in user retention
- Refactored a major project by migrating from JavaScript to React, integrating advanced features like react-hooks, react-router, and lazy-loading, culminating in a 55% improvement in overall efficiency
- Overhauled 2 JavaScript projects, ensuring cross-browser compatibility and adaptive, responsive layouts, driving a 150% surge in conversion rates and client satisfaction
- Led a successful collaboration with a backend team to integrate RESTful APIs into frontend applications, enhancing data retrieval efficiency by 40% and improving overall application performance
- Conceptualized and delivered 5 captivating User Interfaces in Figma, surpassing client expectations with innovative usage of Variables, Styles, and Components. Embraced Responsive Design principles (Auto Layout) for flawless cross-platform usability

R&D Engineer

Knorr-Bremse AG • April 2017 - September 2022

Automotive • Braking Systems

- Completed 3 localization projects of Air Disk Brake (ADB) components, started the serial manufacturing
- Implemented 100+ devices, toolings and equipment in production lines, measuring and testing laboratories
- Designed 700+ component, assembly, installation drawings, specifications, using PTC CREO, Teamcenter & MathCad
- Managed DFMEA analysis for 3 products utilizing PLATO SCIO
- Mentored 5 junior engineers in R&D processes and CAD work

ADDITIONAL EDUCATION

React & TypeScript - The Practical Guide

Udemy • Maximilian Schwarzmüller • 2024

Modern TypeScript Complete Course

Udemy • Ivan Petrychenko • 2024

React - React & Redux Complete Course

Udemy • Bogdan Stashchuk • 2024

API and Web Service Introduction

Udemy • Nate Ross • 2024

Conquering Responsive Layouts

KP • Kevin Powell • 2023

CSS - The Complete Guide 2024 (incl. Flexbox, Grid & Sass)
